# Walk-in closet

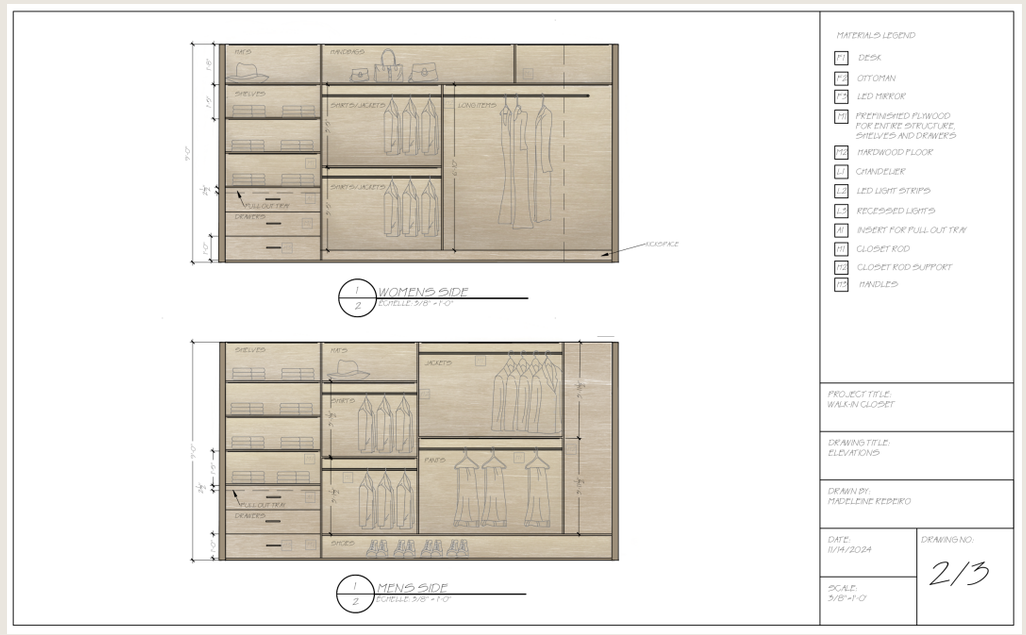

| | |
|---|---|
| **NAME:** | Walk-in closet |
| **TYPOLOGY:** | Walk-in closet |
| **SIZE:** | 184 SF |
| **CONCEPT:** | This project focuses on creating a contemporary, functional walk-in closet tailored for a couple in their forties. Within the fixed space, the layout is organized into two distinct zones, one for women and one for men. Each side is equipped with customized storage that meets precise linear-foot requirements for hanging garments, folded clothing, accessories, and shoes. Durable, aesthetic materials and ergonomic standards guide the design, ensuring comfort, accessibility, and long-term performance. Additional features such as overhead luggage storage and a centrally placed ready-made island or bench enhance usability and support daily routines. The result is a harmonious, efficient environment that reflects a simple, contemporary style while maximizing every inch of the available space. |

# HOCH-Condo

**NAME:** Hoch-Condo

**TYPOLOGY:** Condo building

**SIZE:** 4,250 SF

**CONCEPT:** This project is conceived for an up-and-coming neighbourhood defined by its vibrant local life, multicultural character and strong connection to urban mobility. Surrounded by cafés, restaurants, green alleys, bike paths and public transport, the environment naturally attracts young professionals, couples and small families who value convenience, technology and community. The building aims to offer an urban, healthy and family-oriented lifestyle where daily errands can be done on foot and social interaction is part of everyday living. Interior spaces and common areas such as the furnished lobby, gym, multi-purpose room and rooftop patio are designed to foster comfort, security and a sense of belonging, creating a modern residential experience that supports both individuality and neighbourhood engagement.

# Dual Concept Bathroom

**NAME:** Dual Concept Bathroom

**TYPOLOGY:** Bathroom

**SIZE:** 200 SF

**CONCEPT:** This washroom renovation is designed to help the client visualize two distinct material concepts within a single, consistent layout. The first ambiance, Pure & Fresh, focuses on clarity, brightness and a sense of renewal through clean lines, light finishes and crisp textures. The second ambiance, Warm & Classic, introduces richer tones, timeless materials and a more enveloping atmosphere that evokes comfort and tradition. The project allows the client to compare how different palettes, textures and lighting strategies transform the mood of the room while maintaining identical architectural elements and fixtures. This dual-concept approach ensures the client can confidently select the ambiance that best aligns with his lifestyle and aesthetic preferences.

# Altrea Advertising Agency

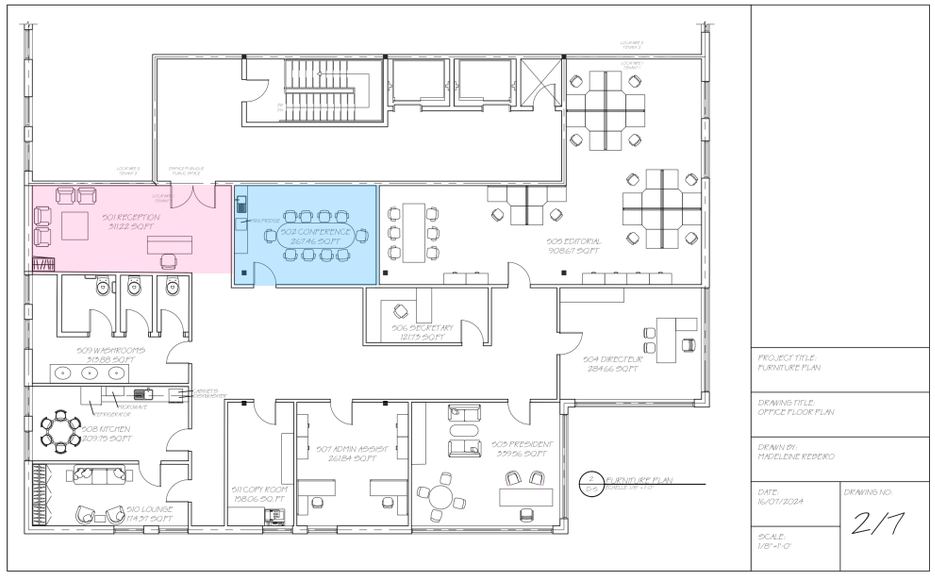

| | |
|---|---|
| **NAME:** | Altrea Advertising Agency |
| **TYPOLOGY:** | Office building |
| **SIZE:** | 2,850 SF |
| **CONCEPT:** | Altrea Advertising Agency will occupy the fifth floor of a newly built office building, and the president seeks a contemporary, energetic workspace that naturally encourages interaction. The design concept focuses on expressing both professionalism and creativity, allowing clients to sense the agency's identity the moment they enter. By thoughtfully positioning public, private, and service zones, the layout will create purposeful transitions between areas while preserving a cohesive, fluid circulation that supports daily operations. |

# KIRINZI

**NAME:** KIRINZI

**TYPOLOGY:** Japanese Restaurant

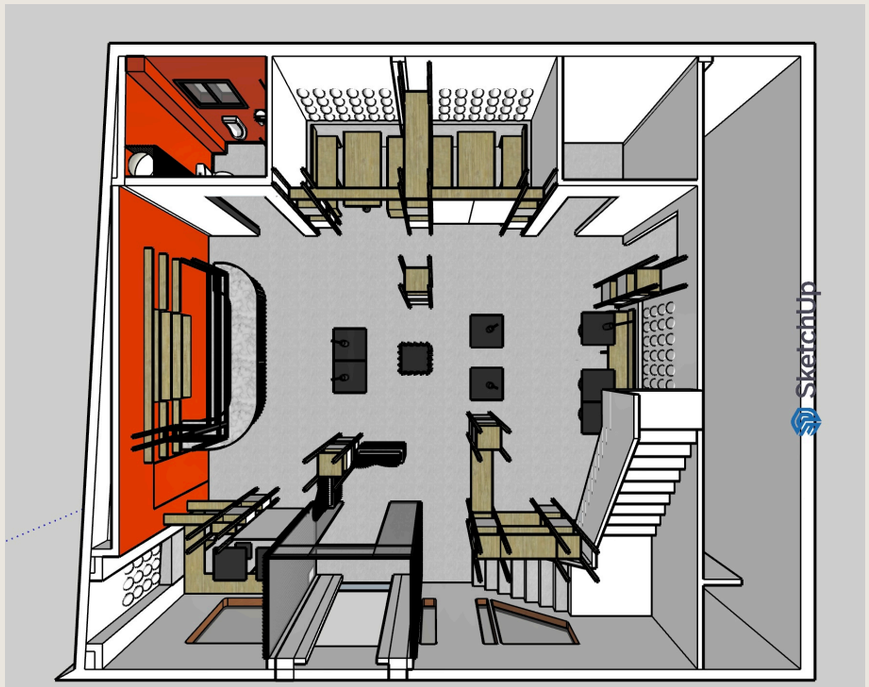

**SIZE:** 3,850 SF

**CONCEPT:** The concept behind Kirinzi focuses on creating a contemporary dining environment that combines Japanese-inspired design with warmth and functionality. Natural wood, vertical slatted partitions, and soft lighting are incorporated to establish a welcoming atmosphere while creating a sense of privacy within the open space. The layout encourages fluid circulation between dining areas, using architectural elements to define individual seating zones without compromising the overall openness. A combination of neutral finishes and deep red accents adds visual interest and character, creating a cohesive space that balances traditional Japanese influences with a modern dining experience.

# Galland Condo

**NAME:** Galland condo

**TYPOLOGY:** Condo

**SIZE:** 700 SF

**CONCEPT:** This renovation focuses on refreshing the condo's kitchen and washrooms with a neutral, modern aesthetic that remains warm and inviting for future tenants. Because the unit will be rented, the design prioritizes timeless finishes and durable materials while still creating a homey atmosphere. In the kitchen, the goal was to open up the previously cramped layout and let the large windows bring in abundant natural light. Light wood flooring and the removal of one pantry help expand the space visually, while the existing structural column is integrated into a more functional layout by enlarging the island to provide additional storage and seating. Earth-toned tiles and a cohesive neutral palette maintain a sense of warmth without overwhelming the space, resulting in interiors that feel clean, contemporary and comfortable for a wide range of renters.

# Summer Cottage

**NAME:** Summer Cottage

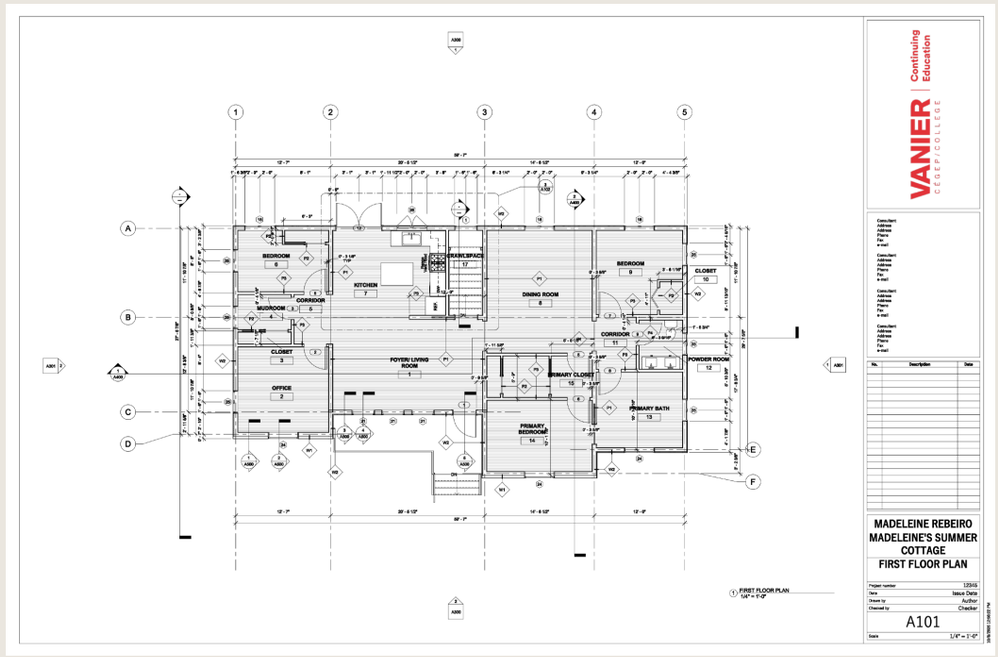

**TYPOLOGY:** Cottage

**SIZE:** 2,100 SF

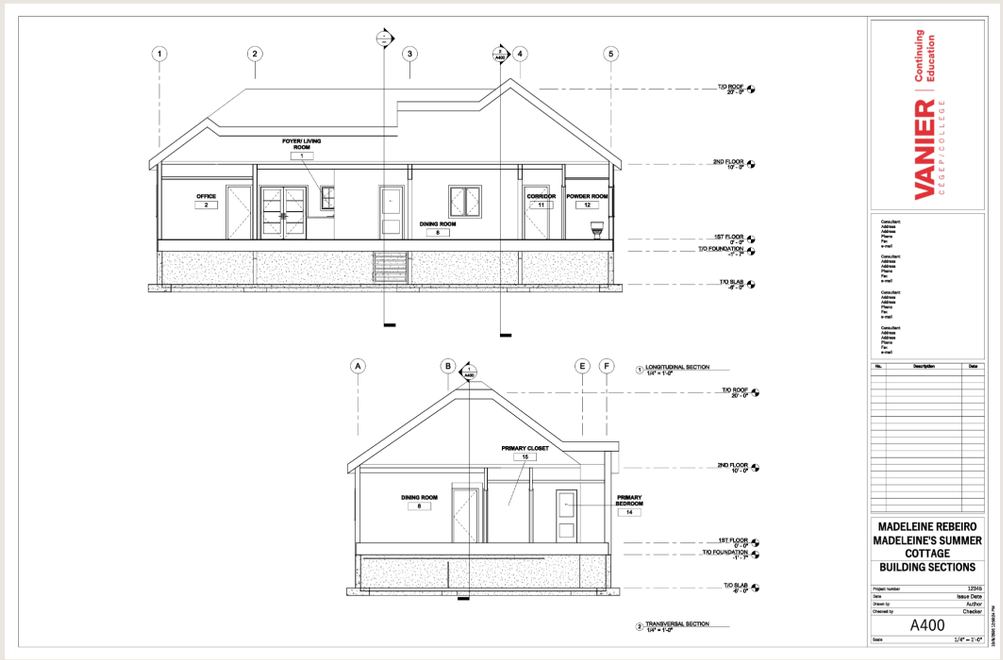

**CONCEPT:** This project focuses on the technical development and architectural representation of a cottage. The objective was to translate architectural plans into accurate technical drawings and three-dimensional models, demonstrating an understanding of residential construction and spatial organization. Through the creation of floor plans, building sections, and 3D perspectives, the project explores the relationship between architectural design and construction documentation. Particular attention was given to proportions, structural elements, and technical accuracy to ensure a clear and cohesive representation of the building.
